CAREER OBJECTIVE

Final-year B.Tech Computer Science (AI/ML) student seeking an AI/ML Engineer Internship. Hands-on experience building end-to-end machine learning pipelines, NLP applications, and production-ready AI solutions. Passionate about solving real-world problems using deep learning, transformers, and Generative AI.

TECHNICAL SKILLS

Languages: Python, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch, XGBoost

NLP: Transformers, Sentence Embeddings, spaCy

Generative AI: LangChain, RAG, Hugging Face, Groq API, FAISS

Backend: FastAPI, Flask

Tools: Git, Docker, Streamlit, Power BI

PROJECTS

Multilingual Hate Speech Detector

- Fine-tuned MuRIL transformer for multilingual classification.
- Achieved 92% F1-score and deployed on Hugging Face Spaces with FastAPI and Docker.

Document Question Answering Chatbot (RAG)

- Built Retrieval-Augmented Generation pipeline using LangChain, FAISS, and Groq API.
- Developed an interactive Streamlit interface for semantic document search.

Customer Churn Prediction

- Trained an XGBoost model on an imbalanced dataset using feature engineering and model tuning.
- Exposed predictions through REST APIs built with FastAPI for real-time inference.

EDUCATION

B.Tech in Computer Science (AI/ML Specialization) — 2026

CGPA: 8.4/10

EXPERIENCE

AI/ML Virtual Intern — EduSkills Foundation (3 Months)

- Built and evaluated supervised machine learning models for classification tasks.
- Performed data preprocessing, feature engineering, and model evaluation using pandas and scikit-learn.
- Worked with industry-oriented AI/ML workflows and best practices.
