CAREER OBJECTIVE

Computer Science undergraduate with strong backend development experience building scalable REST APIs and database-driven applications. Seeking Backend Software Engineer roles where I can contribute to high-performance systems and cloud-based solutions.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript

Backend: FastAPI, Node.js, Express.js

Databases: PostgreSQL, MySQL, MongoDB

Cloud: AWS (EC2, S3 Basics)

Tools: Git, Docker, Postman

PROJECTS

E-commerce Backend System

- Developed REST APIs using FastAPI and PostgreSQL with JWT authentication.
- Deployed application on AWS EC2.

Task Management Application

- Built a full-stack application using Node.js, Express, and MongoDB with analytics dashboard.

Inventory Tracker API

- Designed CRUD APIs using FastAPI and SQL reporting queries for inventory insights.

EDUCATION

B.Tech in Computer Science — 2026

CGPA: 7.8/10

EXPERIENCE

Backend Developer Intern — TechStart Solutions (2 Months)

- Built and maintained REST API endpoints.
- Optimized PostgreSQL queries and supported backend development.
